

ZConverter | Cloud Migration

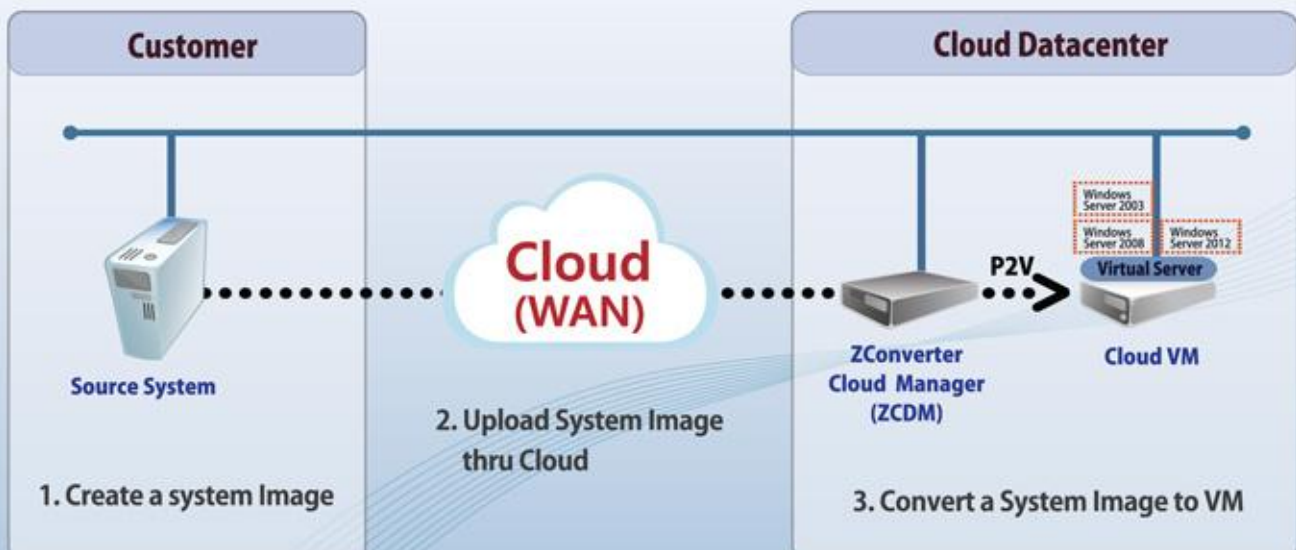

ISA Technologies, Inc.

VMware/Xen/Hyper-V/Physical Server Datacenter Migration

| ZConverter Cloud Migration

ZConverter Cloud Migration provides the fastest and easy-to-use image migration technology. It forgoes the reinstallation of the operating system and the applications to migrate from physical servers to virtual servers or to dissimilar servers in the cloud environment.

| Features

- Online Live Server Migration
- Direct Peer-to-Peer Server Migration
- Dissimilar Server (P2P) Imaging Migration
- Physical to Virtual (P2V) Server Migration
- Physical to Blade (P2B) Server Migration
- Virtual to Physical (V2P) Server Migration
- Virtual to Virtual (V2V) Server Migration
- Low CPU Utilization during live server migration

| Usage

- Virtual Server Migration and Consolidation
- Blade Server Migration and Consolidation
- Dissimilar Physical Server Migration
- Disaster Recovery Backup Center Deployment
- Software-Configuration-Unknown Server Migration

| Benefits

- Save server migration time up to 1/20 times
- Save server migration cost up to 1/10 times
- Simplify complicated server migration job
- Minimize server migration burden
- Minimize administrator's overtime job

| Product Line

- ZConverter P2V Migration (Virtual Server Edition)
- ZConverter P2B Migration (Blade Server Edition)
- ZConverter P2P Migration (Physical Server Edition)
- ZConverter P2P Professional (Professional Edition)

| Support Platforms

Operating System

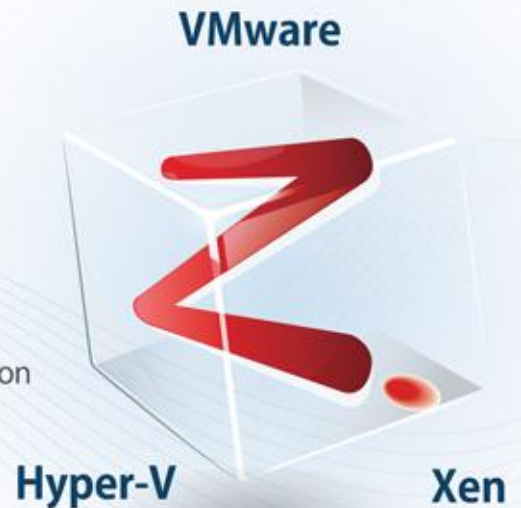

- Windows Server 2012
- Windows Server 2008 Enterprise
- Windows Server 2008 Standard
- Windows Server 2003 Enterprise
- Windows Server 2003 Standard

Virtual Server

- Microsoft Hyper-V
- VMware
- Citrix Xen
- KVM (Open Source)
- Hitachi Virtage(HVM)

Server Platform

- x64 server
- IA64 server
- x32 server
- IBM / HP / DELL
- Customization*

* Customization is possible to support another vendor's server or assembled server per client's request!
